

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A computer-executable method of displaying a document associated with a thumbnail generated based on an original document, comprising:

displaying the thumbnail corresponding to an original document and including an enhancement in appearance;

receiving a request to display the original document;

displaying a first version of the original document, at least a portion of the first version being more similar in visual appearance to a corresponding portion of the thumbnail than to a corresponding portion of the original document based on comparison of the at least a portion of the first version to the corresponding portion of the original document and the corresponding portion of the thumbnail.
2. (Currently Amended) The method according to claim 1, further comprising displaying a second version of the original document in which a portion corresponding to the at least a portion of the first version is more similar in visual appearance to the corresponding portion of the original document than to the corresponding portion of the first version based on comparison.
3. (Currently Amended) The method according to claim 2, wherein the second version of the original document is substantially identical to the original document.
4. (Previously Presented) The method of claim 1, wherein the corresponding portion of the thumbnail comprises an element modified during generation of the thumbnail.
5. (Previously Presented) An information storage medium on which is recorded a program for implementing the steps of claim 1.

6. (Currently Amended) An apparatus for displaying a document associated with a thumbnail image created based on an original document, comprising:

a display device; and

a controller that:

displays the thumbnail image via the display device, the thumbnail corresponding to an original document and including an enhancement in appearance;

receives a request to display the original document associated with the thumbnail image; and

displays a first version of the original document via the display device, at least a portion of the first version being more similar in visual appearance to a corresponding portion of the thumbnail than to a corresponding portion of the original document based on comparison of the at least a portion of the first version to the corresponding portion of the original document and the corresponding portion of the thumbnail.

7. (Currently Amended) The apparatus according to claim 6, wherein the controller further displays, via the display device, a second version of the original document in which a portion corresponding to the at least a portion of the first version is more similar in visual appearance to the corresponding portion of the original document than to the corresponding portion of the first version based on comparison.

8. (Currently Amended) The apparatus according to claim 7, wherein the second version of the original document is substantially identical to the original document.
